The Fosfor Decision Cloud Decision Designer

Transform curiosity into limitless insight for Insurance

What if you could get instant answers to all your critical business queries related to areas of risk, claims, underwriting, revenue, and commission without worrying about complex codes, or depending on analysts and data scientists?

Lumin, the Fosfor Decision Cloud's Decision Designer, is designed to help Insurance organizations make more informed decisions. Lumin goes beyond traditional BI by providing predictive and prescriptive insights which can help organizations identify potential risks and opportunities. It provides real time insights and intelligence for decision making to various stakeholders like carriers, insurance brokers, MGA, and TPA in the Insurance value chain.

Make complex analysis simple

Lumin is an interactive GenAI-powered Decision Intelligence tool which helps Insurance organizations unlock productivity and profitability with 3x faster insights and accuracy in decisions.

Designed for everyone to analyze data and share insights in seconds, Lumin promotes a more proactive and responsive approach to using data for business growth and competitiveness. By offering the ability to ask questions and receive immediate insights, Lumin reduces the time it takes to perform complex analyses, refine strategies, and respond to market changes.

Why Lumin

With Lumin, decision makers are empowered with:

- **3X** **faster insights.** Ask 'what', 'why', 'what if', and 'what will be' questions easily using a simple Q&A interface

- **80%** **savings in analyst hours and costly resources.** Apply advanced analytics interventions like key driver analysis, predictive analytics techniques like forecasting, and prescriptive analysis to your data

- **95%** **reduction in time to insights.** Get the freedom to chart your own insights journey with curated questions that unlock more insights

- **85%** **reduction in ad-hoc query requests.** Get trustworthy and contextual analysis in natural language for easy interpretation

- **From weeks to minutes**. Set up and go live with business use cases and solutions easily with zero dependence on data teams or expert coding skill
