

Micro lens for application cloud readiness

Infinity AppLens is a toolkit that fast-tracks application assessments to determine cloud compatibility and readiness. It conducts deep code analysis to identify migration complexities and recommend effective cloud migration strategies.

Benefits ▶

60% faster application analysis with a scientific and automated approach

25% accelerated cloud migrations

30% reduced technical debts

Why LTIMindtree?

Comprehensive suite of well-defined assessment templates, tools, methodologies, and best practices

Cloud-agnostic assessment providing cloud disposition, architecture blueprint, TCO analysis, and modernization roadmap

Features

200+ built-in cloud native patterns with easy customization

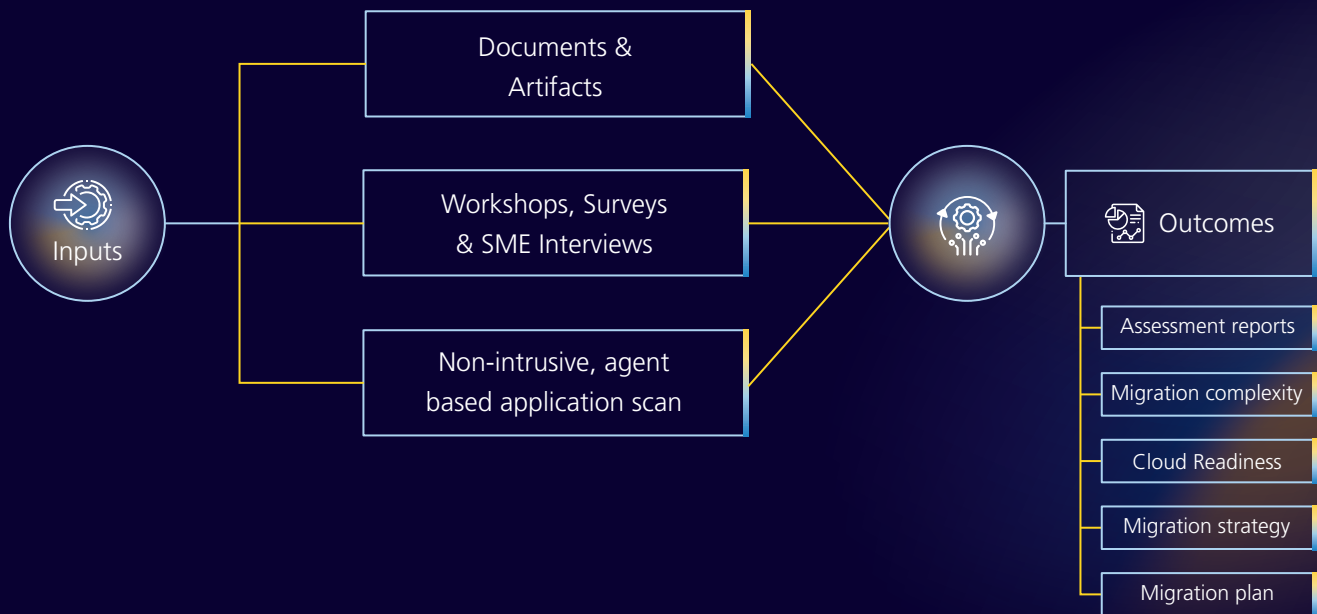

Non-intrusive application scan

Mono to micro, cloud-native, and PaaS recommendations

Assessment reports on migration complexity, cloud-readiness, and resiliency

Highlights application dependencies and third-party library incompatibilities

How Infinity AppLens Works?

Infinity AppLens effectively analyzes and evaluates applications to furnish in-depth assessment reports and recommendations and maps out a right-fit cloud modernization roadmap.

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 750 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world.
